

W. M. Keck Observatory
Presents:

Dr. Thomas Phillips
Caltech Submillimeter Observatory

In his lecture "Exploring the Cool Universe," Dr. Phillips will describe CSO's pioneering role in submillimeter astronomy, a relatively new area of astronomical observation. The talk will also present the Caltech Observatory's latest research on the birthplace of planets and the evolution of the interstellar medium, or the stuff between the stars.

This special presentation is part of the 2009 Maunakea Lecture Series commemorating the International Year of Astronomy.

Thursday
June 18, 2009
7:00 p.m.

Hualalai Learning Theater
W. M. Keck Observatory Headquarters
